SUMMARY

Full-Stack Developer and Frontend Engineer with 5 years of experience in designing, developing, and maintaining responsive web and mobile applications. Proficient in JavaScript and TypeScript, with expertise in creating user-friendly, high-performance interfaces using React and Next.js. Skilled in responsive design, performance optimization, and delivering scalable solutions tailored to diverse business needs. Experienced in mentoring junior engineers, optimizing server performance, and managing hosting environments.

SKILLS

JavaScript, TypeScript, React.js, Next.js, Flutter, Node.js, Firebase, Git, API Development, SEO Optimization, Python, PHP, Java MySQL, SQLite, SCSS, Tailwind

WORK EXPERIENCE

Revyrie Global

Senior Software Engineer

Dec 2022 - Present

Trivandrum, Kerala, India

- Handled frontend responsibilities of a Next.js project that required significant improvements in responsiveness, API integration, and code quality. Conducted targeted, page-by-page refactoring to enhance performance, maintainability, and user experience.
- Resolved production issues using AWS LiveTail and delivered clear documentation and estimates to guide development.
- Developed custom features for an admin web application built on React Admin, including an editable hierarchical tree input with custom parsers/exporters and unique UI/UX components beyond the library's standard capabilities.
- Researched, selected, and implemented libraries and tools for an AI-powered newsletter editor, integrating complex animations with Framer Motion and building a custom image/template slicer to meet strict email client compatibility requirements.
- Developed and maintained scalable front-end architecture using Next.js, ensuring clean, maintainable, and efficient code aligned with best practices.
- Collaborated closely with designers to implement pixel-perfect, user-centric web features enhancing usability and accessibility across devices.
- Mentored junior engineers and fostered knowledge sharing to elevate team performance and code quality.
- Communicated complex technical concepts clearly to non-technical project collaborators, translating requirements into actionable development plans and documentation.
- Provided accurate project estimates and authored technical documentation amid dynamic project environments to improve clarity and planning.
- Ensured cross-platform optimization and responsiveness, guaranteeing consistent performance and seamless user experience on mobile and desktop devices.

StrobeWorks

Web Developer

Feb 2021 - Nov 2022

Pune, Maharashtra, India

- Independently managed end-to-end technical delivery for multiple client projects, including domain acquisition, hosting setup, technology selection, and deployment.
- Designed and developed custom WordPress themes from scratch, translating complex, unique design mockups into fully responsive, high-performance websites with bespoke functionality.
- Built basic APIs and integrated backend services to support dynamic website features and enhance overall user experience.
- Collaborated with non-technical design teams, translating design requirements into technical solutions under tight deadlines and high-pressure conditions.
- Ensured all projects met SEO best practices, including meta tag optimization and structured data implementation, improving site visibility and user engagement.
- Delivered diverse web solutions ranging from fully custom WordPress sites to traditional static websites, each tailored for unique client needs and complex UI demands.
- Took initiative to mentor colleagues on emerging technologies and development best practices, fostering continuous learning and team growth.

StitchBird India

Web Developer

Dec 2019 - Jan 2021

Thrissur, Kerala, India

- Redesigned and developed a responsive company website, boosting loading speed by 40% and enhancing user experience across devices..
- Independently managed multiple domains and hosting environments, handling setup, deployment, maintenance, and troubleshooting to ensure security, uptime, and performance.
- Developed multiple WordPress sites for sub-brands, delivering fast, SEO-optimized, and user-focused solutions.

PROJECTS

Portfolio Website

- Developed a custom personal website using Next.js and GSAP to showcase projects, skills, and experience with interactive animations and responsive design.

The Rolling Concept

- Engineered a custom WordPress theme from scratch for a client using PHP, JavaScript, and SCSS, tailored to meet specific branding and functionality requirements. Ensured responsive design, clean code architecture, and seamless user experience across devices.

PureYet

- Developed a pollution tracking web application using Next.js, integrating the Open-Metro API to display real-time air quality data. Designed with a responsive UI and optimized for performance to deliver fast, accessible insights across devices.

PropMan

- Designed and developed a Windows based property management app using Flutter and SQLite to streamline daily operations, including tenant tracking, rent management, and maintenance scheduling.

CateringApp

- Built an Android-based catering management app using Java and Firebase Realtime Database, enabling catering gigs to be added and managed in real time.
